

Carlos Gallarde

web developer

About me

My name is Carlos Gallarde and I come from Slovakia, Bratislava. Currently working in Cream s.r.o as a full stack junior web developer. I studied Multimedia & Design in Denmark at International Business Academy. Beside programming, I like to workout and I also love to play video games ever since I was young.

Dualna akademia, Jana Jonasa 5, Bratislava Slovakia

Mechanic electrician

Recommendation letters

Recommendation
Carlos Gallarde

15/04 2022

Letter of recommendation

To whom it may concern.

My name is Mile Ninkovic. I was formerly a teacher at IBA in Kolding. I taught several different technical subjects, both within the multimedia design course but also in the web development course. I am currently a software engineer working with embedded systems.

I got the opportunity to get to know Carlos on the third semester of multimedia design, where we spent a lot of time together working and discussing programming, primarily JavaScript. Carlos is an individual with an immense interest in programming and a healthy curiosity for technology. I am very certain that if you accept Carlos at your institution, you will not only get a student, who will finish the degree – but also a student who can contribute positively to mostly any technical discussion.

Carlos has completed every assignment I have thrown at him, and he has even asked for more. He has done a couple of extracurricular projects, mostly because he wanted to get more training in programming. His understanding of programming, optimization and technology make him an ideal candidate for the development programme, whether front-end or back-end.

I hope that you will take my letter of recommendation into consideration.

Best regards

Mile Ninkovic

CONFIRMATION – Mr. Carlos Gallarde

To whom may it concern,

Mr. Carlos Gallarde, born January 24th 2001, is undertaking a dual study programme in the Dual Academy (www.dualnaakademia.sk) since september 2016 in the field of electrotechnics, specialized on industrial electronics and automation. The 4 years' study programme comprises 70% of practical tuition including company on site training and 30% of theoretical studies. The practical tuition is focused on industrial maintenance in the field of automotive with one of our major customers.

We are pleased to confirm that Mr Gallarde shows excellent study results throughout his studies, even mastering to combine with sport activities. His responsible attitude, personal engagement, active approach always fulfilled our high expectations.

We look forward to engage Mr Gallarde in our company after successfully finishing his studies.

Sincerely yours,

Ing. Róbert Záchej
HR Business Partner
